Each threat condition may be amended to lessen or enhanced to increase restrictions based upon unique threat assessments to allow for maximum Command and Control response.

The purpose of the matrix is to provide essential pro-active measures for the Family Safety Defensive Unit (FaSDU). Preps should fulfill condition requirements progressively.

Adherence to the Matrix and Command Decisions is of the utmost importance. Failure to do so will result in irreparable and inexcusable harm to the FasDU in already dangerous times. Extended family who do not comply will be removed from the FaSDU, by force if necessary.
